TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, GSAP, Three.js

Backend & Databases: Node.js, Express, Supabase, Turso (LibSQL), Razorpay Integration

Tools & DevOps: Git, Docker, Ollama (Local AI), Vercel

EDUCATION

B.Tech in Computer Science and Engineering

Expected

APJ Abdul Kalam Technical University

PROJECTS

Ardent | Next.js, TypeScript, Tailwind CSS

2026

- Developed a Career Intelligence Platform that maps invisible connections between skills, goals, and career trajectories.
- Built a dynamic and responsive UI using Next.js and Tailwind, enabling users to effortlessly visualize and navigate their professional growth paths.

Apnaa Khana | Next.js, Supabase, Razorpay, TypeScript

2025

- Engineered a full-stack food ordering platform designed for high reliability, processing real payments for active users.
- Integrated real-time order tracking and secure live payment processing using Razorpay and Supabase as a scalable backend.

AI Resume Analyzer | Python, Ollama, NLP

2025

- Created a privacy-first LLM application that parses and scores resumes locally with zero cloud dependencies.
- Achieved 95%+ keyword extraction accuracy against ATS standards by utilizing local Ollama models and NLP techniques.

InkFlow | React, WYSIWYG Editor

2026

- Built a premium real-time blogging platform featuring a robust 9-button rich-text WYSIWYG editor.
- Implemented a dual-pane HTML code view with live validation and comprehensive media support handling files up to 200MB.

TaskFlow | Next.js, Turso (LibSQL)

2026

- Architected a cloud-native task management application featuring a professional user authentication and management system.
- Migrated and scaled the database using Turso (LibSQL) to ensure optimal data synchronization and low-latency interactions.

- Developed an interactive web-based game demonstrating fundamental state management and responsive user interface logic.

EXPERIENCE & JOB SIMULATIONS

Walmart (Forage)

Mar 2026

Advanced Software Engineering Job Simulation

- Completed practical tasks focusing on advanced data structures, software architecture, and relational database design.
- Performed complex data munging techniques to simulate real-world data processing scenarios in an enterprise environment.

Deloitte (Forage)

Mar 2026

Technology, Data Analytics & Cyber Security Job Simulations

- Executed practical coding and development tasks reflecting day-to-day forensic technology scenarios.
- Conducted data analysis and applied cyber security principles to solve simulated industry challenges.

GUVI

2026

Git Certification

- Demonstrated proficiency in version control workflows, repository management, and collaboration best practices.

ACHIEVEMENTS

- **Hackathon:** Competed in HACKHAZARD'26 (Results Pending).
- **Open Source:** Active contributor to open-source software projects and repositories.
