

Divyansh

Software Engineer (Full-Stack & AI)

New Delhi, India • +91 7303598548 • div.pandey.css@gmail.com

GitHub: github.com/div-pandey (Main: [kumar-div](#)) • linkedin.com/in/div-kumar-cse • Portfolio • NPM: [@kumar-div/lcr-cli](#)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, C++, HTML5, CSS3, SQL

Frontend: React.js, Next.js (App Router), Tailwind CSS, Framer Motion, D3.js, Three.js, GSAP

Backend & Databases: Node.js, Express, Supabase (PostgreSQL), Neo4j (Graph DB), Turso (LibSQL), Prisma ORM, REST APIs

AI & Tools: Sarvam AI (105B LLM), Ollama (Local AI), AI Agents, Razorpay Gateway, Git, Docker, NPM Publishing, Vercel

EDUCATION

B.Tech in Computer Science and Engineering

Expected 2029

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

HACKATHONS & ACHIEVEMENTS

HackerRank Orchestrate — Global Rank #624 / 3,062

INTERNATIONAL

Sept 2026

- Competed against 3,060+ developers worldwide in building and deploying an autonomous AI Financial Affordability Agent ([Leaderboard Verification](#)).
- Architected a deterministic decision engine evaluating 90-day cashflow forecasts, recurring obligations, and purchase viability.

HACKHAZARDS 2026 — International Hackathon Participant

INTERNATIONAL

May – July 2026

- Built **Ardent**, an AI career intelligence platform powered by Neo4j and Sarvam AI, organized by NAMESPACE ([Credential Certificate](#)).
- Recognized for exceptional technical innovation, system architecture, and collaborative development.

Published Open Source Author — NPM Registry

2026

- Created and published [@kumar-div/lcr-cli](#) (Local Command Runner), an open-source terminal workflow optimizer with zero runtime dependencies.

FEATURED PROJECTS

Ardent — AI Career Intelligence Platform [[Live](#) | [GitHub](#)]

2026

Next.js 16, TypeScript, Neo4j Graph DB, Sarvam AI (105B LLM), Supabase, Tailwind CSS, D3.js

- Engineered an AI-powered career operating system mapping non-linear career trajectories using a **Neo4j Knowledge Graph** and **Sarvam AI** reasoning model.
- Built an interactive D3.js force-directed knowledge graph, multi-turn AI mock interview simulator, and verifiable PDF credential issuance.
- Integrated multi-tier subscription billing with Razorpay and implemented row-level security (RLS) on Supabase PostgreSQL.

Apnaa Khana — Production Food Ordering Platform [[Live](#) | [GitHub](#)]

2025 – 2026

Next.js, TypeScript, Supabase, Razorpay, Resend Email API, Tailwind CSS

- Engineered a full-stack e-commerce dining platform processing live transactions with end-to-end Razorpay webhook signature verification.
- Implemented real-time order lifecycle tracking using Supabase live subscriptions, persistent cart management, and automated order alert emails via Resend.
- Constructed an administrative management portal with live order state controls, sales metrics, and menu catalog configuration.

Local Command Runner (LCR CLI) — Developer Workflow Tool [[NPM](#) | [GitHub](#)]

2026

Node.js, JavaScript, CLI Architecture, Cross-Platform Shell Scripting, NPM Registry

- Architected and published an open-source terminal utility with **zero runtime dependencies** to streamline repetitive development commands.
- Built recursive project-root detection across Node.js, Rust (Cargo), Go, and Python to automatically resolve and execute contextual scripts.
- Implemented 11+ safe Git shortcut shims with discrete argument forwarding to eliminate shell injection vulnerabilities and added multi-step pipeline runners.

TaskFlow — Real-Time Collaborative Task Suite [[Live](#) | [GitHub](#)]

2026

Next.js 14 (App Router), Prisma ORM, Turso (LibSQL at Edge), NextAuth.js, SWR, Framer Motion

- Developed a high-performance productivity application leveraging Next.js Server Actions, NextAuth credentials, and bcrypt password hashing.
- Integrated Turso edge-hosted LibSQL database with Prisma ORM and SWR for low-latency data sync and instantaneous optimistic UI updates.
- Designed an editorial glassmorphism UI with spring-physics transitions and responsive task scheduling workflows.

Other Live Deployments: [InkFlow](#) (Blogging platform with WYSIWYG editor & Turso DB) • [AI Resume Analyzer](#) (Local Ollama ATS evaluator) • [Tic Tac Toe](#) (Minimax AI, Web Audio API) • [Interactive 3D Portfolio](#) (Three.js & GSAP)

EXPERIENCE & CERTIFICATIONS

Walmart — Advanced Software Engineering Simulation <i>Virtual Experience Program (Forage)</i> - Engineered optimized data structures and relational database schemas to address simulated enterprise-scale inventory challenges. - Executed data munging operations to process and clean high-volume streaming datasets for operational reporting.	Mar 2026
Deloitte — Technology, Data Analytics & Cyber Security Simulations <i>Forensic Technology & Cyber Defense Programs (Forage)</i> Conducted forensic data investigations, evaluated threat vectors, and applied cyber security protocols to safeguard digital infrastructure.	Mar 2026
GUVI — Git & GitHub Professional Certification Demonstrated mastery of distributed version control, multi-branching release strategies, merge conflict mitigation, and Git internals.	2026
